

Data Protection Advisor Custom Reporting

Course Description

Course Duration

16 Hours

Overview

This course teaches participants how to build custom reports with Data Protection Advisor, using DPA data sources, external data sources and operators. Smart Groups, advanced analysis and rules are also covered. Pre-requisite DPA implementation and management exposure is mandatory as this course takes a deeper dive into the custom reporting subject.

Audience

This course is intended for professionals who wants to generate custom reports using Data Protection Advisor.

Prerequisite Knowledge/Skills

To understand the content and successfully complete this course, a student must have an understanding of:

- Data Protection Advisor terminology, installation, administration, configuration and management.

Course Objectives

Upon successful completion of this course, participants should be able to:

- Create custom reports by modifying existing ones or working from scratch.
- Describe the use of common operators and data sources.

Course Outline

The content of this course is designed to support the course objectives.

- Configuring Reports
 - DPA Reporting Review
 - Review Report Categories
 - Modify an Existing Report
