

HCIP-Security (CTSS) Constructing Terminal Security System V3.0 Training

Target Audience

- Security operation and maintenance personnel
Those who hope to obtain HCIP-Security CISN V3.0 certificate

Prerequisites

HCIA Security

Objectives

- After completing this course, you will be able to provide an in-depth understanding of Huawei's network perimeter security, Huawei's terminal security technologies, and Huawei application security technologies. You will be familiar with and master the advanced functions and deployment scenarios of Huawei firewalls. Master the deployment and maintenance of the Agile Controller-Campus. Understand wireless network security and mobile office solutions, enable students to have the ability to implement and maintain network application security solutions for large and medium-sized enterprises, and understand the basic concepts of big data and cloud computing security.

Content

- 1.1 Terminal Security Overview
- 1.2 WLAN Security Technology
- 1.3 Agile Controller-Campus Installation
- 1.4 User Management Technology
- 1.5 802.1X Authentication and MAC Address Authentication
- 1.6 SACG Authentication
- 1.7 Portal Authentication
- 1.8 Agile Network
- 1.9 eSight Service Management
