ORACLE

LDAP and Directory Services: Essentials Ed 2

Titulo: LDAP and Directory Services: Essentials Ed 2

Clave D79798GC20

Duración: 02 días / 16hrs

Objetivo

El curso LDAP and Directory Services: Essentials Ed 2 tiene como objetivo proporcionar a los participantes una comprensión sólida de los conceptos básicos y las funcionalidades del Protocolo de Acceso Ligero a Directorios (LDAP) y los servicios de directorio.

Algunos de los objetivos específicos del curso incluyen:

- Implementar conceptos LDAP como esquema y estructura.
- Realizar tareas básicas de administración de Oracle Unified Directory (OUD) y Oracle Internet Directory (OID).
- Gestionar datos en OUD y OID creando, modificando y eliminando entradas.
- Integrar Oracle WebLogic Server con el almacén de datos de OUD.
- Realizar tareas de registro básicas como configurar, registrar y ver archivos de registro en OUD y OID.

El curso está diseñado para administradores de sistemas, analistas y desarrolladores que desean aprender a implementar y gestionar servicios de directorio LDAP en entornos de TI

Pre requisito

El curso LDAP and Directory Services: Essentials recomienda los siguientes prerrequisitos:

1. Oracle WebLogic Server 11g: Administration Essentials Ed 2
2. UNIX and Linux Essentials Ed 1
3. Conocimiento básico de comandos de usuario de Unix/Linux

Estos cursos previos te proporcionarán una base sólida en administración de servidores y sistemas operativos, lo cual es útil para entender mejor los conceptos y tareas del curso de LDAP y servicios de directorio.

A quien va dirigido

El curso LDAP and Directory Services: Essentials está dirigido a profesionales de TI que desean adquirir conocimientos sobre el Protocolo de Acceso Ligero a Directorios (LDAP) y los servicios de directorio. Entre ellos se incluyen:

- Administradores de sistemas: Aquellos que son responsables de la implementación y administración de servicios de directorio en sus organizaciones.
- Analistas de sistemas: Profesionales que analizan y gestionan la infraestructura de TI y necesitan comprender cómo funcionan los servicios de directorio.
- Desarrolladores: Aquellos que crean aplicaciones que interactúan con servicios de directorio y necesitan comprender su funcionamiento y administración.

El curso es ideal para quienes ya tienen conocimientos básicos en administración de servidores y sistemas operativos, y desean expandir sus habilidades en la gestión de directorios LDAP.

Temario

Course Overview

Course Objectives 1-2
Target Audience 1-3
Introductions 1-4
Course Schedule 1-5
Course Practices 1-6
Lab Environment 1-7
Classroom Guidelines 1-8
For More Information 1-9
Related Training 1-10

2 Identity Management: Overview

Objectives 2-2
Road Map 2-3
What Is Identity Management? 2-4
Functional Areas of Identity Management 2-5
Road Map 2-6
Directory Services: Products 2-7
Identity Governance: Products 2-8
Access Management: Products 2-9
Quiz 2-11
Summary 2-13

3 Basic LDAP Concepts
Objectives 3-2
Road Map 3-3
Directory Server, Directory Service, and LDAP 3-4
Common Misconceptions About Directory Server, Directory Service, and LDAP 3-5
Road Map 3-6
LDAP Components 3-7
Data Model: Schema 3-8
Naming Model: Structure 3-9
LDAP Structure: Flat or Deep 3-10
Functional Model 3-11
Security Model: Who, What, Which 3-12
Road Map 3-13
Distinguished Name (DN) and Relative Distinguished Name (RDN) 3-14
LDAP Root, Base, and Scope 3-15
Mandatory and Optional Attributes 3-16
LDAP Data Interchange Format (LDIF) 3-17
Sample LDIF File 3-18
LDAP Object Classes 3-19
Top Object Class 3-20
Person Object Class 3-21
OrganizationalPerson Object Class 3-23
inetOrgPerson Object Class 3-25
Object Class Types 3-27
Road Map 3-29
What Can a Compliant LDAP Directory Service Do? 3-30
LDAP Use Case at Oracle: Example #1 3-31
LDAP Use Case at Oracle: Example #2 3-32
Quiz 3-33
Practice 3-1 Overview: Implementing LDAP 3-36
Summary 3-37

4 Directory Services: Introduction to OUD and OID
Objectives 4-2
Road Map 4-3
Oracle Unified Directory (OUD) 4-4
OUD: Key Features 4-5
OUD Servers 4-7
Example: Two Data Centers with Directory Servers and Replication Servers 4-9
Road Map 4-10
OUD Architecture 4-11
Road Map 4-13

Installation Modes 4-14
Installation: Standalone Mode 4-15
Installation: Collocated Mode (Single Domain) 4-16
Installation: Collocated Mode (Separate Domains) 4-17
Road Map 4-18
Setting Up and Populating an OUD Directory Server in Four Quick and Easy Steps 4-19
Specifying a Directory Server Instance Path 4-20
Important Directory Server Setup Options 4-22
OUD 12c Directory Server Setup Wizard 4-25
OUD 12c Directory Server Uninstall Wizard 4-34
OUD 12c Directory Server: Uninstalling Without the Wizard 4-36
Setting Up an Instance Using a Nondefault Location with CLI 4-37
Sanity Check 4-38
Starting and Stopping Directory Servers on Linux and UNIX Systems 4-39
Starting and Stopping Directory Servers on Windows Systems 4-40
Practice 4-1 Overview: Performing Basic OUD Administration Tasks 4-41
Road Map 4-42
Oracle Internet Directory: Overview 4-43
Road Map 4-45
OID Architecture: Overview 4-46
OID Node Architecture: Components 4-47
OID Server Instance Architecture 4-49
OUD Versus OID 4-51
Quiz 4-52
Road Map 4-53
Collocated Mode and Standalone Mode 4-54
Installation: Standalone Mode 4-55
Installation: Collocated Mode (Single Domain) 4-56
Road Map 4-57
Server Administration Tools 4-58
Configuration Utility 4-59
Creating OID Instances 4-60
Creating Other OID Instances 4-61
Deleting OID Instances 4-62
Starting and Stopping OID Instances 4-63
Oracle Directory Services Manager 4-64
Creating OID Connections 4-65
Viewing Connections 4-66

Practice 4-2 Overview: Performing Basic OID Administration Tasks 4-67
Quiz 4-68
Summary 4-70

5 Managing Directory Services: Command-Line Tools
Objectives 5-2
Road Map 5-3
Managing Entries with LDAP Command-Line Tools 5-4
Managing Entries: Scenario 5-6
Creating Entries 5-7
Adding Attributes to an Entry 5-9
Modifying Attribute Values 5-10
Deleting Attributes 5-11
Comparing Attribute Values 5-12
Changing the RDN 5-13
Deleting Entries 5-14
Searching 5-15
Searching: Examples 5-17
Commands Specific to OUD 5-18
Commands Specific to OID 5-19
Creating Entries by Using ldapadd 5-20
Adding and Modifying Multiple Entries Concurrently 5-21
Comparing Attribute Values 5-22
Modifying the RDN 5-23
Practice 5-1 Overview: Managing Directory Entries 5-24
Road Map 5-25
Managing OID Data with Bulk Tools 5-26
Managing Entries with Bulk Tools: Scenario 5-27
Using the bulkload Command 5-28
bulkload: Examples 5-30
Using the ldifwrite Command 5-31
Using the bulkmodify Command 5-32
bulkmodify: Examples 5-34
Using the bulkdelete Command 5-35
Using the catalog Command 5-36
Practice 5-2 Overview: Managing OID Entries by Using Bulk Tools 5-37
Road Map 5-38
Directory Schema 5-39
Managing the Schema 5-41
Managing Schema: Scenario 5-42

Adding Attributes 5-43
Viewing Attributes 5-44
Adding Object Classes 5-45
Viewing Object Classes 5-46
Deleting Object Classes 5-47
Deleting Attributes 5-48
Viewing Matching Rules and Syntaxes by Using ldapsearch 5-49
Practice 5-3 Overview: Managing the Directory Schema 5-50
Road Map 5-51
Importing Data 5-52
Exporting Data 5-55
Road Map 5-58
Importing and Exporting Data by Using LDIF Files 5-59
Practice 5-4 Overview: Exporting and Importing Data 5-60
Quiz 5-61
Summary 5-64

6 Managing Directory Services: OUDSM and ODSM GUIs
Objectives 6-2
Road Map 6-3
Oracle Unified Directory Services Manager (OUDSM), Oracle Directory Services Manager (ODSM): Overview 6-4
Road Map 6-5
Connecting to OUD from OUDSM 6-6
Connections to Multiple OUD 12c Servers 6-8
Connecting to OID from ODSM 6-9
Connections to Multiple OID Servers 6-11
Road Map 6-12
Managing Entries in OUD and OID 6-13
Searching Entries in OUD: Simple Search 6-15
Searching Entries in OUD: Simple Search Example 6-16
Searching Entries in OUD: Advanced Search 6-17
Searching Entries in OUD: Advanced Search Example 6-18
Searching Entries in OID 6-20
Adding, Modifying, and Deleting Entries by Using OUDSM 6-21
Practice 6-1 Overview: Managing Entries 6-23
Road Map 6-24
Managing the Directory Schema Objects 6-25
Managing Object Classes by Using OUDSM 6-26
Managing Attributes by Using OUDSM 6-28

Viewing Syntaxes and Matching Rules by Using OUDSM 6-30
Practice 6-2 Overview: Managing the Schema 6-31
Quiz 6-32
Summary 6-35

7 Basic Logging
Objectives 7-2
Road Map 7-3
Logging 7-4
Road Map 7-5
Log Files: Overview 7-6
Log Files: Standard Versus ODL 7-7
OUD Log Files 7-8
OID Log Files 7-10
OID Log Files: Process Logs 7-11
Road Map 7-12
Viewing OUD Log Files 7-13
Log Files Retention and Rotation Policy Example: Audit Logger 7-14
Logging: Audit Example 7-15
Logging: Access Example 7-16
Logging: Debug Example 7-17
Logging: Errors Example 7-18
Road Map 7-19
Configuring Logging by Using ldapmodify 7-20
Quiz 7-21
Practice 7-1 Overview: Logging 7-24
Summary 7-25

8 Integrating Applications with LDAP Directory Services
Objectives 8-2
Road Map 8-3
Why Integrate Applications with LDAP Directory Services? 8-4
Road Map 8-5
Common Elements in Integration 8-6
Road Map 8-7
JXplorer: Overview 8-8
Connecting to OID 8-9
Exploring OID 8-10
Practice 8-1 Overview: Exploring OID by Using JXplorer 8-12
Road Map 8-13
Configuring OUD as an Authentication Provider 8-14

Creating Test Groups 8-15
Assigning Users in OUD 8-16
Configuring the OUD Authentication Provider 8-17
Verifying the OUD User Login 8-18
Practice 8-2 Overview: Integrating Oracle WebLogic Server with OUD 8-19
Summary 8-20

A Oracle Identity Management Overview
Objectives A-2
What Is Identity Management? A-3
Importance of Identity Management A-4
Functional Aspects of Identity Management A-5
Directory Services: Solutions A-6
Directory Services: Products A-8
Role of OID and OUD in Identity Management A-10
Identity Governance: Solutions A-11
Identity Governance: Products A-13
Oracle Identity Governance Platform A-14
Use Case Scenario: OIM A-15
Access Management: Solutions A-16
Access Management: Products A-18
Oracle Access Management Suite Plus A-23
